Awards

2211 Cambie

The AIBC Special Jury Award for
Contextual Innovation

ARNO MATIS ARCHITECTURE INC.
AND AZUREAN ARCHITECTURE INC.

Inspired by the stone quarry of nearby Queen Elizabeth Park and shaped by the energy of the site, 2211 Cambie is a transit-oriented market rental building. Building forms bend and open to increase daylight in courtyards and public spaces. The development was shaped to maximize views from and through the site in anticipation of development to the south and west. ■

“This is a unique building form for Vancouver on a prominent and difficult site. The building makes me happy. It’s a pleasure. Every time I drive down Cambie I admire it.”

— FRANCES BULA Journalist, Blogger & Juror

Firms:

Arno Matis Architecture Inc. and Azurean Architecture Inc.

Lead Design Architect:

Arno Matis Architect AIBC RAIC

Completion Date:

2014-10

Location:

Vancouver, B.C., Canada
